Art Unit: 3727

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1-2, 11 and 12 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Abraham et al in view of Sadow et al, of record.

Abraham et al teach a luggage construction with a pair of retractable wheels f the type claimed by applicant. Abraham et al further teach the provision of an actuator which is apart from the handle construction as shown at 63,64. To have further provided a cable release system so that the wheels might be released without bending over would have been obvious in view of such teaching by Sadow et al as shown at 138.

3. Claims 3-6 and 13 and 14 remain rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 2 and 12 above, and further in view of Kim, of record.

To have actuated the cable with a button having a lever to move the cable would have been obvious in view of the teaching by Kim at 86 and 90. The button of Kim is considered to be depressed toward the housing as it is rotated. The cable connection to member 86 is considered to be with a lever in the slot.

4. Claims 18-26 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Kuo '888 in view of Kuo '981 and Abraham et al, all of record.

Applicant has amended the claims to add casters received in slots. Both Kous teach the provision of a pair of wheels in slots. Furthermore Abraham et al teach the

Application/Control Number: 10/633,118

Art Unit: 3727

alternative use of casters for auxiliary wheels. To have merely provided two casters for a more stable stance would have been obvious in view of Abraham et al. To have provided separate slots for each would have been obvious in view of Kuo '981

Page 3

- 5. Claims 7-10 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Applicant's arguments filed 2/24/06 have been fully considered but they are not persuasive. Contrary to applicant's argument that Sadow et al does not teach auxiliary wheels releasable with a cable, the wheels 106 in Figure 16 and 17 are indeed auxiliary to the wheels at the bottom of the case which are used in towing in he angled orientation while the auxiliary wheels are deployed for towing on the major wall. They definitely are released by the cable 134. Kim provides a teaching for the use of a button attached to a cable to deploy wheels on luggage. Furthermore contrary to the argument that auxiliary casters aren't taught by the references, Careful review of Abraham et al reveals that either wheels or casters may be used including for the auxiliary wheels.
- 7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
